

Sohrab Gollogly, MD

Fellowship-trained orthopedic spine surgeon

Dr. Gollogly is a fellowship-trained orthopedic surgeon who practices in Monterey, California. In addition to enjoying a wide variety of outdoor activities on California's central coast, Dr. Gollogly continues to perform scientific research and participate in several volunteer international surgical organizations. In 2004,

Dr. Gollogly completed a fellowship in pediatric spine surgery at San Diego Children's Hospital after a fellowship in spine surgery at Centre Des Massues in Lyon, France. Dr. Gollogly earned his medical degree from the University of Washington School of Medicine and proceeded to do an internship and residency in orthopedic surgery at the University of Utah. He completed his undergraduate education in biology at Reed College in Portland, Oregon. Dr. Gollogly has appointments at the Community Hospital of Monterey Peninsula.

Dragan Dimitrov, MD

Neurosurgeon specializing in spine

Dr. Dragan Dimitrov is a neurosurgeon with extensive experience and specialization in spine surgery. Dr. Dimitrov received his undergraduate degree at Duke University where he was on the dean's list and graduated cum laude. He received his medical degree from New York University School of Medicine and completed a

residency in neurosurgery at Duke University in North Carolina. In 2001 and 2002, he was honored with awards from the American Association of Neurological Surgeons related to research in the field of neurosurgery. In his Monterey-based practice, Dr. Dimitrov is referred spine cases from across Central California. He is on staff at Community Hospital of the Monterey Peninsula and Salinas Valley Memorial Hospital.

OVERVIEW

Four out of five Americans will have an attack of back pain during their lifetime. Many people are doomed to endless visits to the back doctor. That's because once you have your first back pain attack, you are four times more likely to have a recurrence. If you have back or neck pain, we are now in a position to help.

Monterey Spine is a multidisciplinary, regional center of excellence for the treatment of back and neck problems. Monterey Spine physicians are able to care for any type of back or neck problem, from the simple back or neck strain all the way to the most complex spine surgery. It includes physical medicine and rehabilitation physicians dedicated to the nonsurgical management of spine problems, spine surgeons who can handle complex spine problems, and diagnostics — all under one roof. Because Monterey Spine has X-ray and physical therapy under one roof, the back or neck pain patient no longer has to drive around town for care. All the necessary diagnostic testing and non-operative treatment under one roof eliminates the need for multiple referrals, delayed care and confusion.
